List of Azure services

Azure Services

This reading includes details of the most commonly used categories of Azure Services:

- Compute
- Web
- Internet of Things (IoT)
- Big data
- AI
- DevOps
- Networking
- Storage
- Mobile
- Databases

Compute

Compute services are often one of the primary reasons why companies move to the Azure platform. Azure provides a range of options for hosting applications and services. Here are some examples of compute services in Azure.

Service name	Service function
Azure Virtual Machines	Windows or Linux virtual machines (VMs) hosted in Azure
Azure Virtual Machine Scale Sets	Scaling for Windows or Linux VMs hosted in Azure
Azure Kubernetes Service	Cluster management for VMs that run containerized services
Azure Service Fabric	Distributed systems platform that runs in Azure or on-premises
	Managed service for parallel and high-performance computing
